

scaffold systems

The UpRight range of Access Tower Systems also includes:

Zippy

The Zippy workstand is a multi-purpose work tool that is easy to transport, passes through standard single doorways and is ready for use in seconds. Can be used as a workbench or trolley to move tools and equipment.

Zippy 20

Zippy 20 is a durable lightweight aluminum tower system that can be used for a variety of applications and gives 20ft. of working height. Ideal for contractors, tradesmen and building maintenance requirements.

Stairwell

The UpRight one-piece Stairwell VX base system makes overhead and wall access over stairways easy. In 5 simple steps the base section and standard aluminum components can be moved to the worksite and erected. Components snap together without the use of tools.

Stairway

A quick and easy to assemble access alloy tower system that features inclined stairladders for easy safe ascent even when carrying tools and equipment.

Snapout (Boiler Scaffold)

Snapout offers an unbeatable solution to working at heights where access is severely restricted. An entire level of Snapout tower folds down to a one - piece bundle that will pass through a 14 in. square opening.

Spandek and Spandek Walkways

Spandek is a lightweight aluminum walkway/decking system that can be used to bridge simple towers or provide complex staging systems.

Special Applications

UpRight engineers offer custom built solutions to your unusual access problems. Examples include temporary and permanent walkways, stagings and lighting towers.

Aviation

UpRight offers access solutions to the aviation industry. UpRight manufactures mobile and fixed docking stations using standard components or custom built sections.

scaffold systems VX and Span

UpRight Aluminum Scaffold

Systems are lightweight, high strength tower systems, designed for fast easy assembly without tools.

A versatile, low maintenance solution to constructing everything from simple freestanding towers to more complex staging systems.

Available in single width (29ins.) and double width (54ins.) and lengths of 6ft. 8ft. and 10ft.

UpRight Aluminum Scaffold

Systems feature the unique high strength Rib-Grip jointing system, guaranteed for 10 years.

Meets all applicable OSHA and A.N.S.I. requirements.

Single width Span tower ideal for restricted areas.

Double width Span tower.

1 Rib-Grip cold formed joints

The cold-formed Rib-Grip jointing process is a key feature of the UpRight Scaffold Tower Systems and provides twice the strength and durability of traditional welded types.

2 Wind Lock Clip

The TX2000 Platform features an integral Wind Lock Clip for securing the platform to the tower.

3 Automatic Locking Hooks

- Quick release
- 225° of contact
- A rhino hook that prevents damage

4 Ladder Extension Frame

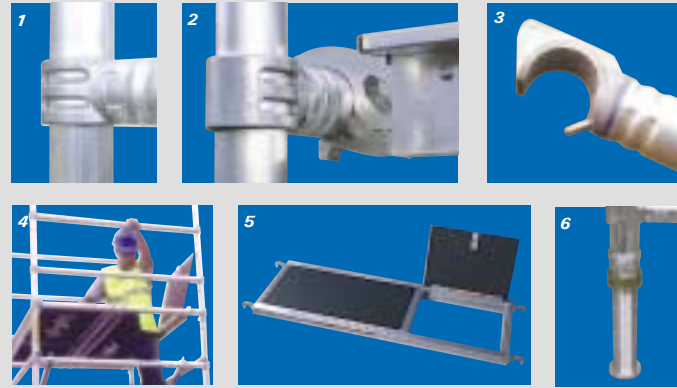

The Span ladder frame is available in various heights and sets up without tools.

5 TX2000 Platforms

The TX 2000 lightweight platform, with hatch provides all-round edge protection. All components can be easily replaced should damage occur.

6 Adjustable Legs

Up to 12in. of adjustment is provided by Quick-Adjust legs. Once locked they cannot be accidentally released. To be used for levelling only.

k e y f e a t u r e s

Components are inter-changeable and work together to create multiple configurations to custom heights, lengths and widths.

Easy access over pews and auditorium seating.

VX base on difficult access circular stairway.

Zippy folding workstand

Zippy is a low cost, versatile workstand for a variety of applications. Zippy can be easily transported in a small pick-up truck, and ready for use in seconds. If more height is required Zippy 20 is available with a 20ft. working height.

UpRight VX and Span Systems work in areas with difficult, limited access and where load weight is a concern.

VX Base

VX base sections fold into place in seconds providing a quick sound base for easy tower erection. Available in Single or Double widths.

Easy access through standard doorways and elevators.

VX Base folds out in seconds.
