# SPAN 500 ladderframe

**Zip-Up Span 500 ladderframe** is a new, highly adaptable, fastrack tower system featuring 500mm rung spacing.

**Zip-Up Span 500 ladderframe** towers can be constructed in 0.5m increments and do not need separate guardrails, giving greater flexibility and less inventory to stock.

The Z-configuration bracing enables quick, trouble-free assembly while providing a very rigid structure.

**Zip-Up Span 500 ladderframe** is fully compatible with other Span towers, walkways and accessories to ensure maximum functionality for each location.

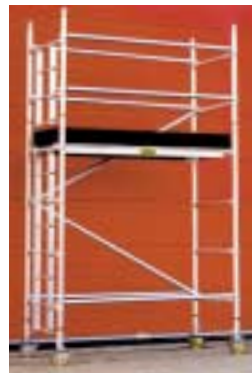

Span 500 ladderframe towers can be set up in minutes.

**Rib-Grip cold formed joints**

The cold-formed Rib-Grip jointing process is a key feature of the Access Tower Systems and gives greater strength and durability than traditional welded types.

*Span 500 ladderframe features 500mm rung spacing, large platform areas and integral ladder side frames.*

Span 500 ladderframe is fully compatible with other Span towers, walkways and accessories.
